

ELSAG® VPH900 FOR PARKING MANAGEMENT

THE ELSAG® VPH900 LOW-COST ALPR SOLUTION FOR PARKING MANAGEMENT EFFICIENCIES

The ELSAG® Video Plate Hunter 900 (VPH900) combines 25 years of experience in optical character and license plate recognition with off-the-shelf IP camera technology to deliver a cost-conscious solution for parking management.

Now, parking lot owners and parking management companies can increase the efficiency of permit validation, lot/garage inventory, fee payment, enforcement, and security systems by utilizing license plate reader data to identify vehicles faster.

Once deployed, the ELSAG VPH900 system generates data records from video and digital photos of license plates produced by IP cameras. The records include:

- › License plate number of every vehicle
- › Date and time stamp for the entry and exit of every vehicle

Each license plate number is instantly compared to hot lists and white lists to aid parking management and enforcement.

- › White lists contain plate numbers of permitted vehicles. If the VPH900 system reads a plate number that's not on the white list, alarms generate in real time to parking enforcement for immediate investigation.
- › Hot lists contain plate numbers of vehicles of interest such as those with expired permits or vehicles belonging to delinquent payers.

Let our team work with you to design the best bundled solution to meet your needs.

We take the guesswork out of identifying the proper IP camera to use in your ELSAG VPH900 solution. While a variety of IP cameras will work, including ones you might already own, we have selected IP cameras with various capability levels and price points to deliver a turnkey solution. The camera selection is based on the intended use and environmental factors like light conditions and mounting distance. Along with the selected camera, the bundle includes all the necessary components to deploy the system efficiently and effectively, including a robust API for integration with third party parking management and access control products.
