

Car park management solutions

Our core business is the development and production of comprehensive car park management solutions – hardware and software. GEA PARK is the result of the unique experience and resources of GEA in the design and implementation of its automated payment collection systems.

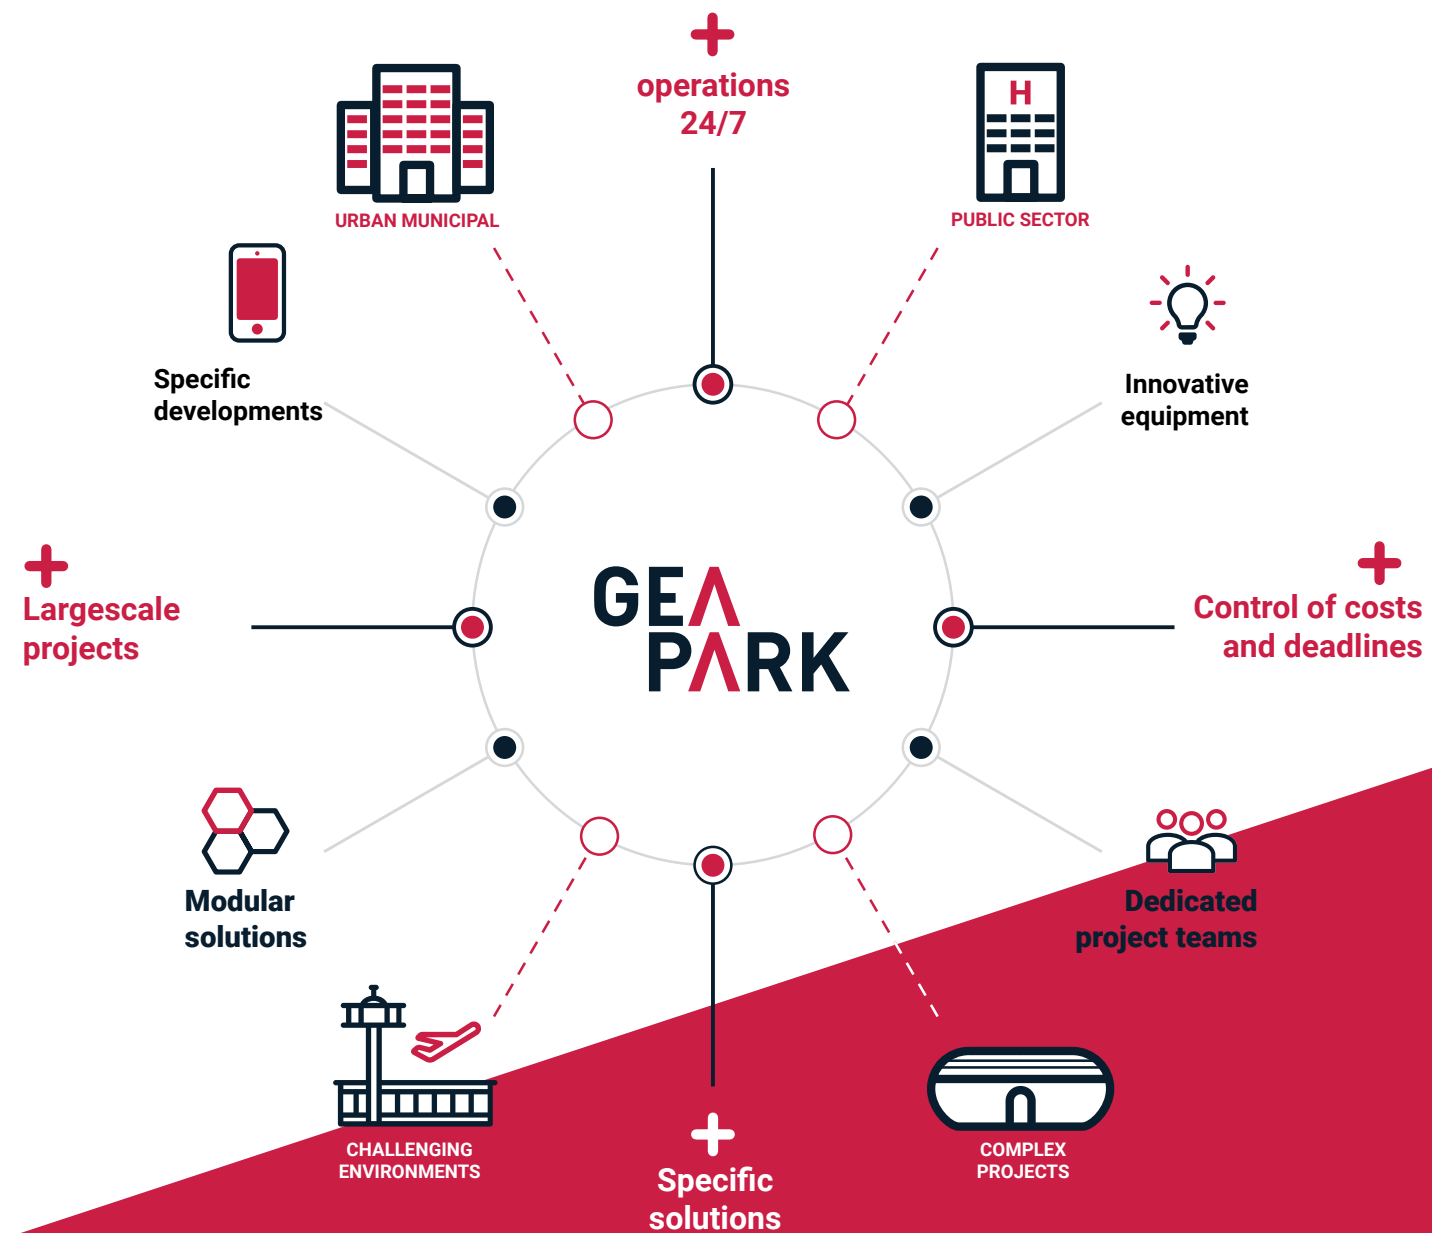

Our teams use their proven knowledge to create reliable, robust and refined products both technically and aesthetically. We guarantee that our products are easily maintainable, and have backwards-compatibility with each of our solutions.

With a great eye for detail we maintain close relationships with all our suppliers to provide the very best components for our solutions.

By listening to our clients and users, we have perfected, innovative solutions, based on

the most up to date, technically advanced digital equipment. We pay close attention to changes in people's behaviour, utilisation and service demands. Our duty is to support your project, helping you to provide the best service for your users.

Each year, millions of people, across the world, use our automated and manual payment systems within the complex world of car parks and the challenging environment of motorways.

GEA PARK

Our commitment at the centre of your project

OUR SOLUTIONS

Flexible, robust, designed for challenging environments

The GEA PARK range diligently meets the needs of all types of projects.

GEA PARK offers a flexible and upgradable system. Each item in our range (entry and exit terminals, operating system, software) can be adapted to create a solution tailored to your needs.

Our expertise in robust software and hardware enables us to deliver reliable and proven solutions which guarantee maximum, non-stop operations, regardless of the complexity of the project design.

THE GEA PROJECT TEAMS

Commitment is an intrinsic part of our company

We share your objectives, supporting you throughout your project. Our teams are ready to assist you to assure the complete success of the operation, from the very beginning to a successful completion.

Unique reactivity

Our human-sized Organisation gives us the flexibility to adapt, and to anticipate the changing needs and obligations related to projects.

Our Second-to-none technical expertise, has been providing services for more than 30 years

We pride ourselves in offering increasingly robust solutions to satisfy our clients.

THE PROJECT PHASES FOLLOW ON SMOOTHLY THANKS TO THE EXPERIENCE AND INVOLVEMENT OF THE GEA TEAM. WE MEET ALL FUNCTIONAL, BUDGET AND DEADLINE OBJECTIVES, FROM THE INITIAL STUDY TO THE IMPLEMENTATION OF THE PROJECT.

DEVISING SOLID SOLUTIONS,
LEADING INNOVATION,
SUPPORTING OPERATORS
TO ACHIEVE PERFORMANCE
AND USER SATISFACTION.

Your trust and confidence is essential to the success of our projects

This makes our communications simple, sincere and has allowed us to maintain privileged relationships with our clients over time.

RANGE OF PRODUCTS

OUR EXPERTISE

Control of the project processes

At a site managed exclusively by our teams, GEA controls the entire hardware and software design and production processes. This means we can offer our clients complete control of the quality of our products, solutions and services, as well as complete control of budgets and excellent deadline reactivity.

Equipment reliability

Our experience in integrating motorway toll collection solutions enables us to develop highly reliable car park equipment for challenging and complex environments.

On-site experience

Since our creation, through multiple international projects in more than 30 countries, GEA has acquired expertise and strong capabilities in the deployment and installation of comprehensive solutions. We guarantee continuity of operation.

Innovation

GEA has always been committed to innovation, starting new trends for operators and integrators. This constant innovation enables GEA Park to offer ongoing support to our clients in relation to evolving uses, standards and needs.
